

Intek
PLASTICS

Innovative Solutions that Drive Your Success

When you partner with Intek Plastics, you gain a competitive edge with full-spectrum plastic solutions and a sustainable focus that elevate your products and your business. From precision extrusion and plastic injection molding to cutting-edge prototyping, our services set your project up for success.

Your Advantages

End-to-End Solutions

Extrusion, injection molding, prototyping, fabrication, assembly and everything in between.

If it's plastic, we've got it covered.

Dedicated Customer and Technical Service Team

Intek is your partner for success. Your dedicated team ensures smooth sailing from start to finish, with personalized service every step of the way.

Innovation at Its Best

Cutting-edge technology, progressive materials and the latest manufacturing technologies to keep your products ahead of the curve – because we're always thinking one step ahead (or maybe two).

Sustainability at the Core

Bioplastics, regrind, waste reduction – we're committed to a greener tomorrow. Ultra-low landfill scrap and energy-efficient processes make sure your parts aren't the only things that are sustainable.

Markets Served

- Fenestration
- Industrial
- Medical Devices
- Electronics
- Data Centers
- Consumer Products
- Lighting
- Power and Energy
- Aerospace and Defense

Our Solutions

- Engineering Support
- Design for Manufacturing
- Prototyping
- In-House Tooling
- Complex and Multi-Material Extrusions
- Plastic Injection Molding
- Secondary Services
- Inventory Management

What You Can Expect

Expert Engineering Support:

Our team works closely with you on design for manufacturing and prototyping, bringing your ideas to life with efficiency, precision and maybe even a touch of magic.

Complex, Multi-Material Capabilities:

From intricate, multi-material extrusions to mind-bending injection molding, we tackle the tough projects that others simply can't – because simple is not in our vocabulary.

ISO 9001 Certified Excellence:

Along with ISO 9001, we're proudly AS 9100D certified, UL registered, FDA approved for medical devices, and ITAR-compliant. With nearly 100% on-time delivery and an unwavering commitment to quality, you can trust that you're in expert hands.

In-House Tooling:

State-of-the-art tooling that saves you time, cost and potential headaches. We've got the right tools for the job – and we know how to use them.

Secondary and Added Value Services:

Beyond delivering the best parts on the planet, we make your life easier. Assembly, packaging, on-time delivery and inventory management – we handle the logistics so you can focus on what matters most.
